VEHICLE OPERATIONS AND MAINTENANCE DESCRIPTION OF SERVICES

C1. Overview. MARB Vehicle Management provides effective management, receipt, assignment, accountability, operation, transfer, inspection and maintenance services for the base vehicle fleet, tenant organization vehicles and transient vehicles. Vehicles assigned are a combination of in-house government vehicles and limited GSA-leased vehicles. GSA vehicle servicing and maintenance shall be accomplished IAW GSA policy defined in the GSA packet maintained in each vehicle. See A-TE-4b(2). Services include, but are not limited to, providing minor, major, and preventive maintenance services for the Air Force non-leased vehicle fleet, using in-house, contract and warranty services; performing on-base/local area mobile maintenance services; maintaining maintenance records; providing analysis and reports using On-line Vehicle Interactive Management System (OLVIMS) and the Defense Energy Support Center (DESC) Fuels Automated System (FAS), commonly referred to as the “Purple Hub”; and providing materiel support through government and commercial vendors and agencies, as required. SP shall comply with all state and local laws in the performance of this SOW.

C2. OPERATE VEHICLES

C2.1 Taxi Service. Upon receipt of customer request, the SP shall determine supportability (vehicle, driver availability, customer entitlement), confirms or denies request, schedules and provides services IAW AFI 24-301, Chapter 1. The SP shall determine if credit card should be issued to the driver and ensures appropriate information is input to the OLVIMS. See C-TE-1, SDSC01.

C2.2 Cargo Pick-up and Delivery. Upon receipt of customer request, the SP shall determine supportability (vehicle, driver availability, customer entitlement), equipment and materials needed, confirms or denies request, schedules and provides services IAW AFI 24-301, Chapter 1. The SP shall determine if credit card should be issued to the driver and ensures appropriate information is input to the OLVIMS. See C-TE-1, SDSC01.

C2.3 Vehicle Operator Training/Licensing. The SP shall assign and validate trainers, develop and coordinate vehicle lesson plans as required and document training IAW AFI 24-301, Chapter 4. The SP shall process customer request to obtain government vehicle license and update vehicle operator status in the OLVIMS IAW AFI 24-301, Chapter 4. The SP shall provide guidance and manage the Commercial Driver’s License (CDL) Program as outlined in AFI 24 –301, Chapter 4. See C-TE-1, SDSC02.

C2.3.1 Vehicle Control Officer (VCO) Program. The SP shall manage the MARB VCO program IAW AFI 24-301, Chapter 1, Para 1.2.16 and AFP 24-317. See C-TE-1, SDSC03, and C-TE-3, CD03.

C2.3.2 Minimum Essential List. The SP shall develop and maintain a vehicle Minimum Essential Listing. The purpose of this listing is to establish vehicle assignment priorities and recall priorities. This listing shall be prepared IAW AFI 24-301.

C2.4 Operator Care Program. The SP shall establish and implement an operator care program that will ensure the vehicles are in a safe and operable condition and specific operator care maintenance is performed using Air Force Form 1800 series as a guide IAW AFMAN 24-307, Chapter 6. See C-TE-1, SDSC04.

C2.4.1 The SP shall inspect the commander’s cars as indicated by double asterisk in C-TE-2d weekly.

C2.4.2 The SP shall clean, wash, service and wax the commander’s cars at least semi-annually IAW AFI 24-307, Chapter 1, paragraph 1.6. but more often as needed.

C2.5 Fleet Wash Facility The SP shall provide all services and supplies necessary to maintain the fleet wash facility IAW AFI 24-301, Chapter 1, para. 1.2.11, and accepted industry practices, and comply with state, local and federal environmental policies and procedures. See C-TE-1, SDSC05.

C2.6 U-Drive-It. Upon receipt of customer request, the SP shall provide U-Drive-It services IAW AFI 24-301, Chapter 1. The SP shall determine if credit card should be issued to the driver and authorization granted to exceed the POD if required. The SP shall ensure appropriate information is input to the OLVIMS. See C-TE-1, SDSC06.

C3 MAINTAIN VEHICLES.

C3.1 Requirements The SP shall provide scheduled and unscheduled vehicle and equipment maintenance and repair services

for the March ARB, vehicle fleet, government owned vehicles and equipment. Services shall include, but not be limited to, inspections, servicing, and major and minor repair of vehicles and equipment accounted for in the OLVIMS. Scheduled maintenance is accomplished IAW TO 36-1-191 (provides maintenance frequencies). The SP shall notify customer of scheduled maintenance requirements based on schedule generated by OLVIMS. The SP shall be responsible for scheduling work and determining vehicle maintenance priorities IAW AFMAN 24-307, Chapter 1, Para. 1.14. The SP shall provide work status to the customer, (typically, an individual designated by the unit as the vehicle point of contact), as requested. See C-TE-1, SDSC07.

C3.1.1 Upon receipt of vehicle addition or notice of deletion to fleet inventory, the SP shall research data received with vehicle and input to OLVIMS and other related data systems, such as SBSS, AFEMS. Other services shall include, but not be limited to performing an acceptance inspection, or serviceability inspection (for vehicle deletions), and processing vehicle for service or disposition. If vehicle is being transferred to another location, or being used for extended TDY, the SP shall generate a transfer disk, and vehicle file for transfer with vehicle. The SP shall maintain record file of selected records. All work under this paragraph shall be accomplished IAW AFMAN 24-307, Chapter 2.

C3.1.2 **Technical Order Publications.** The SP shall maintain the existing Vehicle Maintenance and Operations T.O. account. The SP shall maintain a file of T.O.s for Vehicles and Equipment that they are responsible to maintain and service. The SP shall use the Automated Technical Order Management System (ATOMS) to maintain, add, delete, and update T.O. requirements

C4 TYPES OF MAINTENANCE

C4.1 **Minor Maintenance.** Upon customer arrival, the SP shall inspect vehicle for operator care, damage, or possible abuse; check mileage, and determine work requirements. The SP shall accomplish minor maintenance when the work requirement is determined to be 2 hours or less in duration and does not require expenditures exceeding \$60.00 for any single component. The SP shall enter the work on AF Form 1827, Minor Maintenance Work Order, and ensure completed work information is input to the OLVIMS.

C4.2 **Major Maintenance.** When work exceeds the minor maintenance requirement, the SP shall generate AF Form 1823, Vehicle and Equipment Work Order, perform work and notify customer for pick-up. This work includes repairing or replacing parts, assemblies, sub-assemblies and components IAW AFMAN 24-307, Chapter 1. The SP may have to fabricate parts when required and perform body, glass, upholstery and structural repair. The SP shall ensure completed work information is input to the OLVIMS.

C4.3 **Scheduled Maintenance.** Based on OLVIMS schedule, the SP shall perform scheduled maintenance. See C-TE-1, SDSC08. All labor, supplies, parts, and materials required for scheduled maintenance are included in the firm fixed price CLIN established in Schedule B for Tab C.

C4.4 **Mobile Maintenance.** Upon receipt of request for mobile maintenance, the SP shall determine validity, and if valid, respond to the request. If parts are needed, the SP shall order parts, recover the vehicle, schedule repair and complete. All attempts shall be made to accomplish the required work at the breakdown site. The SP shall ensure completed work information is input to the OLVIMS.

C4.5 The SP shall provide operator care maintenance required by the operator care program for all vehicles assigned to the SP.

C4.6 **Recovery Service (Wrecker).** Upon receipt of customer request, the SP shall determine customer entitlement, confirm request, determine retrieval equipment and materials needed, and provide services IAW AFI 24-301, Chapter 1. Determine if DoD Fleet Credit Card should be issued to retrieve vehicles IAW local policy. The SP shall ensure appropriate information is input to the OLVIMS. See C-TE-1, SDSC09.

C4.6.1. The SP shall provide written procedures for notification and a listing of on-call mechanics to the ACO. (C-TE-3, C002, C008)

C4.7 **Tires.** The SP shall provide tire shop services to include inspection, repair and replacement and assistance in changing tires not covered in the operator care program. The SP shall use recapped tires when possible IAW T.O 36-1-191, Chapter 4. The SP shall comply with AFMAN 23-110, Chapter 25, Para 25.17, when special purpose tires are not available commercially and must be purchased through the SBSS.

C5 ACCOUNTABILITY.

C5.1 **Parts.** The SP shall account for daily parts issues downloaded from the SBSS, and parts purchased commercially by

entering purchase data into OLVIMS. The SP shall ensure accountability of all parts waiting to be installed, or still on-order. The SP shall update OLVIMS parts locations and associated OLVIMS data elements IAW AFSCM 24-1, OLVIMS End User Manual.

C5.2 Bench Stock The SP shall create a quarterly “High Cost Bench Stock Listing” and enter consumption data and low cost bench stock data into OLVIMS. All work under this paragraph shall be performed IAW AFMAN 24-307, Chapter 3.

C5.3 Fuels. The SP shall perform a daily download of fuel issued data from the “Purple Hub” web site <<http://www.desc.dla.mil>>, screen for accuracy, resolve discrepancies and input to OLVIMS. The “Purple Hub” is a component of the FAS, “Fuels Automated System” and contains all the DESC fuels issued information.

C5.4 Fleet Service Credit Cards. The SP shall manage the base fleet service credit cards. Services shall include requisitioning, receiving, issuing and administering control of the U.S Government Fleet Service Card IAW AFI 24-301, Chapter 3.

C5.5 Vehicle Authorization Listing (VAL). The VAL is a headquarters generated listing of all vehicles authorized at MARB. The listing is used for fleet management purposes.

C5.5.1 The SP shall provide fleet management services to include, but not limited to, adjustments to unit vehicle assignments, receiving new assets from the Vehicle Buy Program (or rotating vehicles), receiving new leased vehicle authorization, updating the Registered Equipment Management System (REMS) and the CA/CRL IAW AFI24-301, Chapter 6.

C5.5.2 Upon request for a new vehicle authorization, the SP shall process request IAW with applicable paragraphs in AFI 24-301, Chapters 5 and 6 and perform monthly reconciliation of the vehicle fleet IAW AFI 24-301, Chapter 6, Paragraph 6.20

C5.6 Reports. The SP shall provide various reports and analysis generated by the OLVIMS and some reports requiring manual preparation IAW C-TE-3. OLVIMS generated reports (AFI 24-301, Chapter 1, AFM 24-307, Chapter 2, and AFRC Sup thereto) include, but not limited to, “Limited Technical Inspection Report”, Materiel Deficiency Report”, Vehicle Master List, Annual Vehicle Buy Submission. Non-automated reports are generally reports required by higher headquarters or public law. See C-TE-1, SDSC10.

C5.7 Other Reports. The SP shall provide other reports, to include, but not limited to, a monthly off-base mileage and fuel usage report IAW C-TE-3, Item C21. This report is used to support requests for refunds of prepaid fuel taxes from the State of California and is prepared IAW AFI 24-301, Chapter 3. The SP shall complete a monthly reimbursable verification report (report is for maintenance performed for host tenant organizations) IAW AFMAN 24-307, Chapter 2.

C5.8 War Readiness Materials (WRM) Assets. The SP shall provide WRM management services to include validating changes and inputting changes to the SBSS and OLVIMS (IAW AFI 24-301, Chapter 6, and AFI 25 -101, War Reserve Material (WRM) Program Guidance and Procedures.); serve as member of the Base WRM Review Board, and administer the WRM vehicle program.

C6 OLVIMS. The work orders for vehicle maintenance are processed via the OLVIMS. Work requests are received from the customer, information is input into the OVLIMS and a work order is generated. After work is performed, information concerning the completed work is also entered into the system and is used to generate various reports for local and higher headquarters use. The OLVIMS is composed of several modules which collect data on vehicle utilization, cost, dispatches, operator licenses, and other specialized data on the base vehicle fleet that is managed and supported. The OLVIMS system interfaces with the Standard Base Supply System. The SP shall comply with OLVIMS operating procedures as described in AFCSM 24-1. See C-TE-1, SDSC11.

C7 History Folder. The SP shall establish and maintain a history folder for each vehicle in the fleet that is maintained by the SP IAW AFMAN 24-307, paragraph 6.6. Should the vehicle be transferred, this folder shall be provided to the receiving activity.

ACCEPTANCE INSPECTION. An inspection performed on all new and used vehicles and equipment received on base, before placing them in service that shows the condition of the vehicle. If use of the vehicle would aggravate the problem or if the discrepancy creates a safety hazard, discrepancies noted on AFTO Form 91 must be corrected before placing the vehicle in service.

ACCIDENT REPAIRS. Repairs required as a result of collision, regardless of whether the object collided with a vehicle, and regardless of whether the vehicle requiring repairs was the moving unit.

AGRICULTURAL EQUIPMENT. Equipment designed and used for landscaping, cultivating, or processing agricultural products.

AREA ASSISTANCE. A service provided by the geographical Air Logistics Center (ALC) to the requesting activity in resolving operational, maintenance, and technical problems.

COMMERCIAL REPAIR. Maintenance of vehicles or equipment accomplished by contract with an approved commercial organization on either a one-time or a continuing basis.

DEPOT MAINTENANCE. Maintenance that is the responsibility of, and performed by designated maintenance activities to augment stocks of serviceable material, and to support organizational and intermediate maintenance activities. This maintenance is accomplished by more extensive shop facilities and equipment and personnel of higher technical skill than are usually available at lower levels of maintenance. As a rule, its phases consist of repairing, modifying, overhauling, reclaiming, or rebuilding parts, accessories, subassemblies, components, and end items; the emergency manufacturing of unavailable parts; the manufacturing of end items; and providing technical assistance to using activities and intermediate maintenance organizations. Depot maintenance is usually accomplished in fixed shops, by interservice support agreement, commercial contract, or by on-site teams.

EMERGENCY VEHICLES. Vehicles designed and used to respond to situations that have or may result in injury, death to personnel, damage or the destruction of property; e.g., fire trucks, ambulances, etc.

INDICATORS. Used to monitor the operation or condition of a management goal.

INTERMEDIATE MAINTENANCE. Maintenance that is usually the responsibility of, and performed by designated maintenance activities for direct support of using organizations. Its phases usually consist of calibrating, repairing, or replacing damaged or unserviceable parts, components, or assemblies; modifying material, manufacturing emergency or unavailable parts; and providing technical assistance to using organizations. Intermediate maintenance is usually accomplished by the using command in fixed shops and by mobile service and repair units.

MAINTENANCE. All actions required to keep a vehicle or piece of equipment serviceable. This includes inspection, testing, servicing, repairing, overhauling, rebuilding, remanufacturing, cannibalizing, and reclaiming parts, accessories and end items.

MOBILE SERVICE OR REPAIR. Service or repair performed away from the vehicle maintenance shop by a mobile maintenance unit equipped and manned to provide this support.

MOTOR VEHICLE. Any item of equipment mounted on wheels or tracks that derives motive power from a self-contained power unit, or is designed to be towed by and used together with such self-propelled equipment.

ON-LINE VEHICLE INTERACTIVE MANAGEMENT SYSTEM (OLVIMS). A menu-driven system using interactive screen processing that provides automated on-line edits of input data for vehicle management use. The system maintains a database of vehicle information to provide local management and higher headquarters with motor vehicle operations and maintenance information. This information includes pertinent cost and failure information for use in surveying the Air Force and Air Force Reserve vehicle fleet.

OPERATOR. Any military or civilian employee who is regularly required to operate motor vehicles. This includes chauffeurs, mounted messengers, truck drivers, or guard-drivers.

OVERHAUL. The restoration of an item to a completely serviceable condition, as prescribed by a maintenance serviceability standard.

PREVENTIVE MAINTENANCE. The care and servicing by personnel to maintain equipment and facilities in satisfactory operating condition by providing for systematic inspection, detection, and correction of incipient failures, either before they occur or before they develop into major defects.

RECURRING MAINTENANCE. Maintenance required as a result of incorrect diagnosis, poor quality of work, design deficiency, operator abuse, ineffective quality control, or material failure.

SCHEDULED MAINTENANCE. Periodic prescribed inspections or servicing of equipment, accomplished on a calendar, mileage, or hours-of-operation basis.

RECYCLING. The use, reclamation and reuse of a material. Use/reuse includes return of the recovered waste of the original process or when the waste is substituted for a raw material in another process. Waste reclamation includes processing of residual waste to recover a useful product and generation of waste material (AFI 32-7080, Atch 1).

REGISTERED EQUIPMENT MANAGEMENT SYSTEM (REMS). A system of managing the inventory of AF vehicular equipment.

SCHEDULED INSPECTION. A planned inspection accomplished at regular intervals of either calendar time, miles, or hours of operation.

SERVICEABILITY STANDARD. A condition a vehicle must meet or surpass to be declared serviceable and satisfactory for operations.

TRANSIENT GOVERNMENT VEHICLE. A vehicle belonging to an Air Force activity or other government agency and not officially assigned for maintenance or operational support by coordinated agreements.

U-DRIVE VEHICLE. A vehicle assigned to the SP, but dispatched for up to 72 hours use by another function. The requester provides the vehicle operator. Base U-Drive service will be furnished when the base taxi or commercial transportation cannot satisfy the requester's requirement.

UNECONOMICALLY REPARABLE. A vehicle or piece of equipment whose one-time repair estimate exceeds the one-time repair allowance, or whose age or mileage life expectancy has been attained.

UNSCHEDULED MAINTENANCE. Maintenance that is not scheduled but is required to correct deficiencies and to restore the vehicle or equipment to a serviceable condition.

VEHICLE ABUSE. Any act or omission that has caused or may cause vehicle damage not attributable to fair wear and tear, accident, or incident.

VEHICLE, COMMERCIAL TYPE. A vehicle designed to meet civilian requirements and used without major modifications for routine purposes in connection with the transportation of supplies, equipment or personnel.

VEHICLE INCIDENT. Vehicle damage that was clearly beyond the control of the vehicle's operator. It is not classified as an accident.

VEHICLE, MILITARY TYPE. Those that result from military research and development processes and are designed primarily for use by forces in the field in direct connection with, or support of, combat or tactical operations.

VEHICLE MISUSE. Use of vehicle for other than its intended use.

WORK ORDER. A blanket authorization to perform specific work. The Vehicle Equipment Workorder (AF Form 1823) is used to record VOC time, direct fixed-hourly rates, discrepancies, parts and maintenance actions, including accident, abuse and incident repairs. Also the Minor Maintenance Workorder (AF Form 1827) is used to record minor maintenance on jobs of two (2) hours or less on vehicles and equipment items.
